Partners for Possibility
Endorsement: NGO Award

Partners for Possibility gives us as business people a platform to assist in the education sector, which is in crisis, with the skills and networks that we have. I find it especially appealing that the partnership between a business person and school principal is structured as an equal partnership in which both parties can learn from each other.

I am convinced that PfP will create a lasting change in the schools in which they work and I am heartened to see how hard they are working to increase their network in Gauteng and across South Africa.

Partners for Possibility has had a significant impact on my life and the school where I am assisting – Moetapele Primary School.

I fully support the work that PfP is doing and welcome any public recognition that they receive for their tireless efforts to improve the prospects of all our children.
