

OUR BOLD AND AUDACIOUS VISION:

Quality education* for all children in South Africa by 2025

* Quality education means significantly improved education outcomes

Mobilising citizens and communities to partner with principals and teachers to educate our children...

We will do this by:

- Education as a national priority
- Mobilising citizens and communities to partner with principals and teachers to educate our children (every one of us have a role to play - we need the gifts and contributions of all citizens)
- Facilitating and contributing to collective impact (shared goals, aligned initiatives, shared theory of change)
- School at the centre of community
